

National E-TREK Library

Objective:

- This Library is intended to be a central resource point for the collection and sharing of OziExplorer Track and/or Waypoint Files for digital mapping enthusiasts across Australia who are converts to this emerging method of navigation.
- Any interested person (4WD'r, Caravaner, Tourer, Camper, Fisho etc) may participate, be they a club member or not - **everyone is welcome**.

Works like this:

- Join the library by registering your name and e-mail address with the convener.
- The library contents will be advised by e-mail to the registered members on a quarterly basis.
- Library *ideally* operates on a one for one basis ie. member deposits a file which permits them to action a withdrawal.
- Library is pleased to supply E-Treks in advance - hopefully the recipient will make an updated or new donation at a later time.
- The Library will only grow with member input - please be part of developing this opportunity.

The process:

- Your track (.plt) and waypoint (.wpt) files should be living in your OziExplorer/Data file.
- Simply select the required file, attach it to your e-mail to roger@smartersafety.com.au and press enter - nothing else needed.

Technical Issues:

- To ensure consistency, map datum should always be set to WGS84.
- Please only supply your own work, do not forward files from proprietary software.
